PROFILE SUMMARY

Passionate and dedicated individual aspiring to become a skilled software developer. Seeking an opportunity within your esteemed organization to apply my technical knowledge and problem-solving skills. Eager to collaborate on innovative projects, continuously learn new technologies, and contribute to the team's success through dedication and creativity.

EDUCATION

KMBB College of Engineering and Technology, Under BPUT **2022 – 2026**
Bachelor of Technology in Computer Science and Engineering
CGPA - 8.34

RCM Science College **2020 – 2022**
Intermediate, CHSE Board, Science
Score - 70.16%

NH High School **2019 – 2020**
Matriculation, BSE Board
Score - 64.5%

SKILLS

- **Programming Languages-** JavaScript
- **Frontent :** HTML ,CSS ,ReactJS ,TailwindCSS, BootStarp
- **Databases-** Orecle SQL,MangoDb
- **Backend & frameWork :** NodeJS , ExpressJS
- **Core Concepts :** Object Oriented Programming, Database Management System, DSA

PROJECTS

Real time chat application

- Developed a scalable real-time chat application using MERN & Socket.io, enabling low-latency bidirectional communication.
- Implemented secure JWT-based authentication with protected routes and session management.Designed RESTful APIs with Node.js,Express, integrating MongoDB for persistent storage and Cloudinary for media handling.
- GitHub : https://github.com/santoshpadhiali/CHATliFY

Job portal platform

- Built a modern job portal platform enabling seamless interaction between recruiters and job seekers with a responsive UI using React.js and Tailwind CSS.
- Implemented secure JWT-based authentication with role-based access, along with scalable backend services using Node.js, Express.js, and MongoDB.
- Developed features like job posting, advanced filtering, and application tracking while optimizing API performance for smooth user experience.
- GitHub : https://github.com/santoshpadhiali/Hire-HUB

Code plus

- Developed CodePulse, a full-stack real-time collaborative coding platform using React.js, Node.js/Express, MongoDB, and GetStream SDK, enabling live video calls, chat, and multi-user code editing.
- Built a secure code execution system supporting multiple languages (JavaScript,Java,Python,C,C++) and implemented authentication using Clerk with role-based access control.
- Optimized application performance with fast load times and execution speed while ensuring security through sandboxing, input validation, and HTTPS encryption.
